

BMSvision

Empowering your productivity

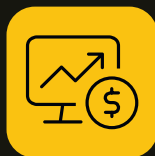

MES

Manufacturing Execution System
for the plastics and packaging industry

On-prem
or hybrid

Proven ROI

Real-time
planning

Integration
expertise

Increased
sustainability

- Flexible deployment: on-premise or hybrid (edge-to-cloud) architecture.
- Perpetual or subscription based license model: choose the investment model that fits your business.
- Advanced Planning & Scheduling (APS) in real-time.
- Connect your machines, any brand and any generation, to your operational systems.
- From paperless workflows to waste reducing insights and energy efficient operations: accelerate digitalization and operate more sustainable.

Future-proof MES architecture

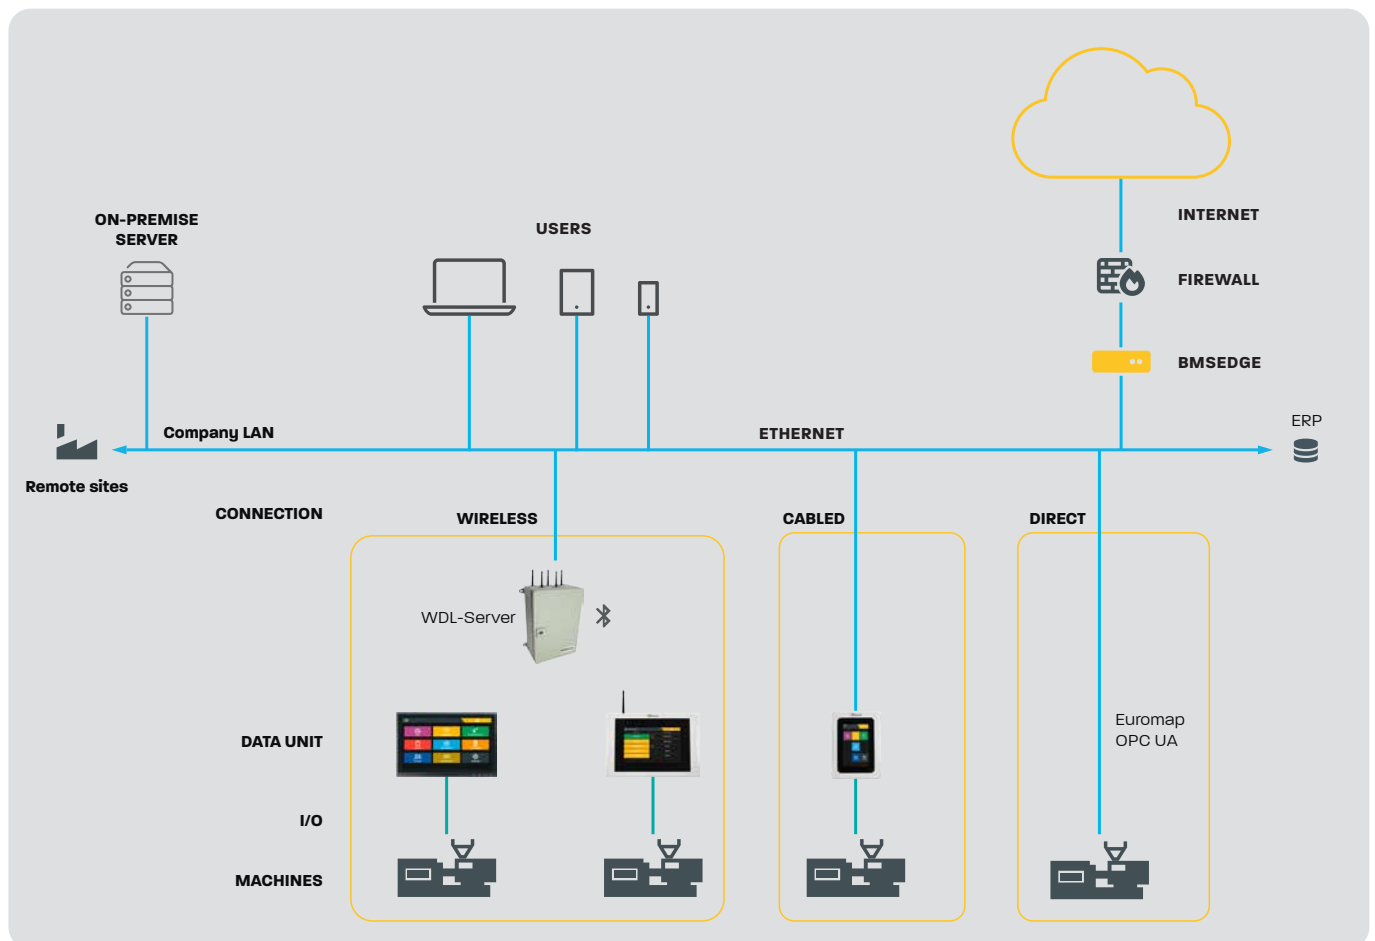

BMS offers several deployment solutions according to your needs:

On-premise architecture:

- MES is installed on servers managed by your IT department.
- For maximum local storage and self-managed IT.

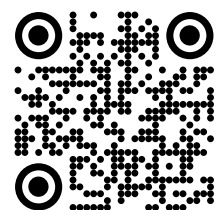

Edge architecture:

- Edge device, managed by BMS. Compliant with CRA (Cyber Resilience Act).
- For scalability, easier maintenance, and fast rollouts.

Fast, proven ROI

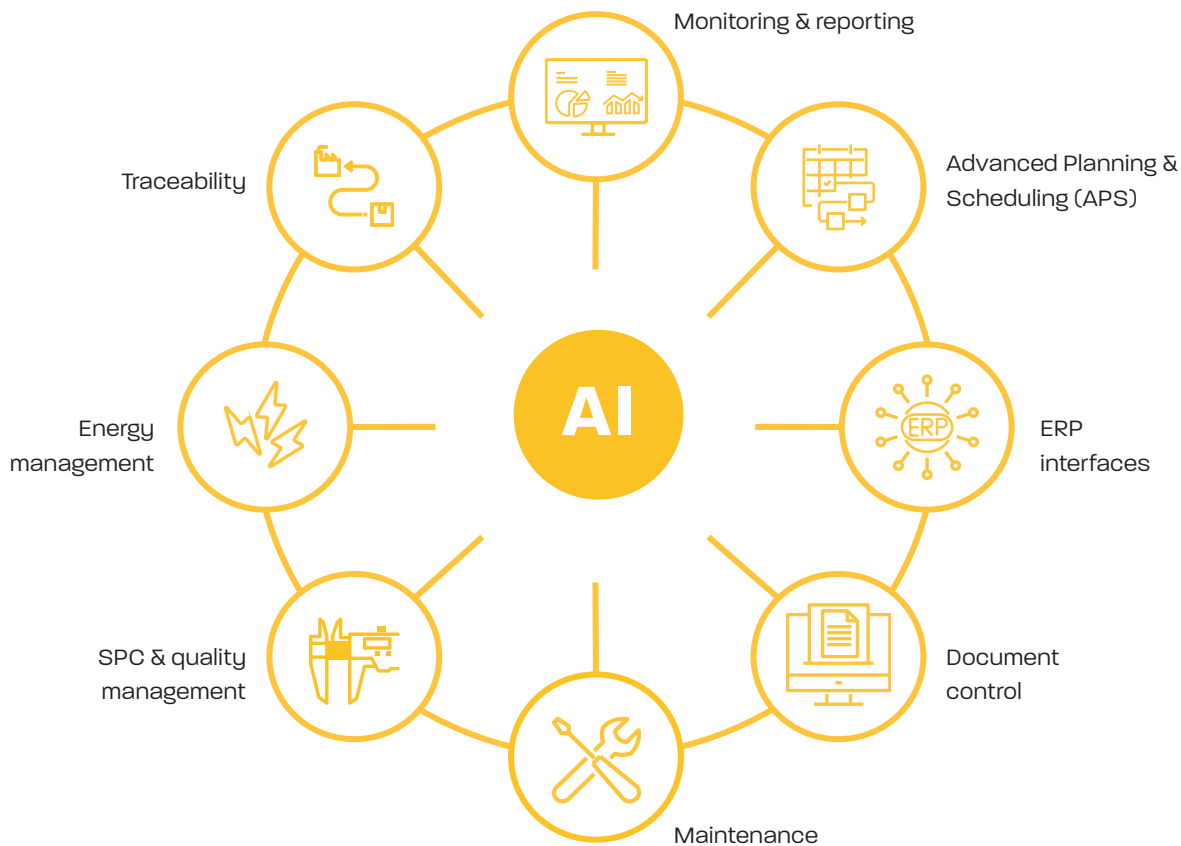

Our MES solutions don't just optimize your factory, they generate a fast return. With measurable gains in efficiency, quality, energy consumption, reduced downtime, and full production visibility, you get a rapid return on investment. Scan the QR code to hear directly from our customers.

Modular MES: build a future-proof foundation

Unlock the full potential of your factory with our modular MES platform.
Start with the essentials and scale as you wish.

Your connected factory

Our MES integrates seamlessly into your existing IT/OT environment, with standard interfaces connecting to your ERP, WMS/inventory systems, PLM and quality/lab systems.

On the shop floor, we turn 'any brand, any generation' machines into smart assets. Our MES connects directly to every machine and PLC, creating a unified digital thread. Whether through our Data Units, WEB-DUs, or smart devices, you gain real-time visibility into production, quality and energy efficiency.

Fast to deploy and easy to scale, our architecture offers the flexibility of full control.

Security & GDPR

BMSvision applies the highest standards of Cybersecurity Infrastructure and Development policies, in line with the manufacturing industry standards IEC 62443 and ISO27000, to provide state-of-the-art secure solutions to its customers, partners and employees. Furthermore, BMSvision applies the Cybersecurity framework OWASP SAMM (Software Assurance Maturity Model), which covers the NIST SSDF (Secure Software Development Framework). We guarantee that your personal and valuable business data in the cloud is protected by the highest safety and security techniques and processes.
